

Bioplastics product profile

PLA thermoformed single-use hot beverage cups

Luminy® PLA for thermoformed cups:

- Biobased
- Reduced carbon footprint
- Can withstand boiling water
- Good processing economics

Exclusive, global premier: a fully biobased disposable cup for hot drinks. Our partners have successfully developed a thermoformed cup for hot drinks and soups, based on Luminy® high heat PLA neat resin.

The cups provide a sustainable, biobased replacement for current PS thermoformed cups. Furthermore, the good processing economics enable high speed thermoforming. PLA material can be used on existing PS thermoforming lines

Total Corbion PLA is a global technology leader in Poly Lactic Acid (PLA) and lactide monomers. PLA is a biobased and biodegradable polymer made from annually renewable resources, offering a reduced carbon footprint versus many traditional plastics. The Luminy® PLA portfolio, which includes both high heat and standard PLA grades, is an innovative material that is used in a wide range of markets from packaging to consumer goods, fibers and automotive. Total Corbion PLA, headquartered in the Netherlands, will start up a new production plant in Thailand in the second half of 2018. The company is a 50/50 joint venture between Total and Corbion.
